

Andrew Fowlie

Associate Professor | Physicist & Data Scientist

Researcher in statistical inference, computational methods and scientific software, with applications in physics. 60+ papers; 3000+ citations; 50+ presentations. Research contributions include Bayesian inference, simulation-based inference, model selection, uncertainty quantification and open-source software.

andrew.fowlie@xjtlu.edu.cn

[andrewfowlie.github.io](https://github.com/andrewfowlie)

github.com/andrewfowlie

Areas of specialization

- Bayesian inference, statistical modelling and computational methods, including parameter estimation, model selection and scientific software
- Data analysis and statistical inference for high-energy physics, including collider experiments, dark matter, supersymmetry and Higgs physics
- Model comparison, fine-tuning, naturalness and the hierarchy problem

Experience

- 2023 – Associate Professor (2025 –); Assistant Professor (2023 – 2024)
School of Maths and Physics, XJTLU, Suzhou, China
- 2018 – 2022 Associate Professor, Department of Physics, Nanjing Normal University, Nanjing, China
- 2015 – 2018 Postdoctoral researcher, Department of Physics, Monash University, Melbourne, Australia
Particle phenomenology and Bayesian statistics with [Prof. Csaba Balázs](#)
- 2014 – 2015 Postdoctoral researcher, [KBFI \(National Institute of Chemical Physics and Biophysics\)](#), Estonia
Particle phenomenology with [Prof. Martti Raidal](#)
- 2009 – 2013 Ph.D., University of Sheffield, UK
[Bayesian Approach to Investigating Supersymmetric Models](#) supervised by [Prof. Leszek Roszkowski](#)

Research

GRANTS

Approx. RMB 1.4M/€180K as PI and RMB 2.7M/€340K as CI, including NSFC and ARC awards.

- 740 000 RMB ▪ **PI.** 560 000 RMB NSFC + 180 000 RMB host matching. NSFC RFIS-II (W2432006), *Percolation of first-order cosmological phase transitions in the early Universe*, 1 January 2025 – 31 December 2026
- 180 000 RMB ▪ **PI.** Post-graduate Research Scholarship (PGRS FOSA2406017), *Bayes factor surface for searches for new physics*
- 100 000 RMB ▪ **PI.** Research Development Fund (RDF-22-02-079), *Exact-Approximate methods for searches for new physics at the Large Hadron Collider*, 1 July 2023 – 30 June 2025
- 550 000 RMB ▪ **CI.** NSFC General Program (12275134), 暗物质粒子及其相关的新物理唯象学研究, [Wu, L.](#) (PI), Fowlie, A., et al., 1 January 2023 – 31 December 2026
- 449 659 AUD ▪ **CI.** Australian Research Council Discovery Project ([DP210101636](#)), *Electroweak phase transition: A cosmological window to new particle physics*, [Kobakhidze, A.](#) (Primary Chief Investigator), [Balázs, C.](#) (Chief In-

vestigator), [Ramsey-Musolf, M.J.](#) (Partner Investigator), Fowlie, A. (Partner Investigator), 13 December 2021 – 12 December 2024

350 000 RMB ■ **PI.** NSFC RFIS-I (11950410509), *Discovering dark matter with Bayesian and frequentist statistics*, 1 January 2020 – 31 December 2021

PUBLICATIONS

- *h*-index 31; 3000+ citations; 50+ publications
- First or corresponding author in *Nature Comm.*, *Nature Reviews Methods Primers*, *Rept. Prog. Phys.*, and twice in *Phys. Rev. Lett.*; published in *Prog. Part. Nucl. Phys.*
- Two papers with 250+ citations; six papers with 100+ citations & fifteen papers with 50+ citations
- See [INSPIRE](#) for complete publication data

Journal bibliometrics (percentile, quartile and CiteScore) from [Scopus](#). Citation data from [INSPIRE](#). Corresponding-author publications are marked with a star; author lists in particle physics are alphabetical.

RESEARCH SOFTWARE

- **Scientific computing in particle physics and cosmology:** [BubbleProfiler](#), [PhaseTracer](#), [TransitionSolver](#) and [thermal_funcs](#)
- **Global analyses of high-energy physics models:** [GAMBIT](#)
- **Statistical computing:** [stanhf](#) (Stan implementation of HistFactory models), [polystan](#) (nested sampling for Stan models), and [kingpin](#) (treed Gaussian processes)
- **Experimental/laboratory software:** [cmdpasco](#) (data acquisition from PASCO smart carts)
- **Research productivity tools:** [bibiso4](#), [texcheck](#), and [bibtexify](#)
- **Example of open-source scientific software contributions:** [SciPy](#) (merged pull request of efficient computation of moments of normal distribution)

TALKS & SEMINARS

- Over 50 presentations and talks
- Slides: <https://andrewfowlie.github.io/talk/>

Invited

- 2026 [1] [Mapping the ALPs: A Naturalness Map for Axions and ALPs](#), 2026 Workshop on New Physics and Interdisciplinary Sciences (NPhiS 2026) , 18 May
- 2025 [2] [Are axion solutions to the CP problem fine-tuned?](#), The Fourth International Conference on Axion Physics and Experiment, 29 July
- [3] [Fitting—statistical modeling and analysis for physics](#), Lecture, Third New Physical Numerical Numerical Computing and Simulation Frontier Workshop, Xinxiang, 3 July
- 2024 [4] [A cry of distress from Nature? Fine-tuning in scientific theories](#), XJTLU CHIPS Wisdom Forum, 9 October
- [5] [Cosmological phase transitions: From perturbative particle physics to gravitational waves](#), XJTLU SMP Research Excellence Workshop, 29 May

- [6] [Testing fundamental theories with global fits](#), Seminar, Duke Kunshan, 10 May
- [7] [Testing fundamental theories with global fits](#), Seminar, Suzhou University, 26 April
- [8] [The Bayes factor surface for searches for new physics](#), NANOGrav New Physics Working Group, 20 February
- 2023 [9] [Origins of parameters in adimensional models](#), Seminar, Fudan University, 20 October
- [10] [From first order phase transitions to gravitational waves](#), The 2023 Shanghai Symposium on Particle Physics and Cosmology, Tsung-Dao Lee Institute, 23 September
- [11] [New physics in the garden of forking paths](#), Mini-Workshop on Anomalies at the LHC, Tsung-Dao Lee Institute, 21 September
- [12] [Opening up Nested Sampling](#), MaxEnt 2023, 6 July
- [13] [Origins of parameters in adimensional models](#), Seminar, Zhejiang University, 2 June
- [14] [Origins of parameters in adimensional models](#), Seminar, Shandong University, 24 May
- 2022 [15] [Herding cats? — Bayesian and frequentist methods and compromises](#), University of Goettingen CATs seminar, 14 May
- 2021 [16] [Nested sampling for frequentist computation: fast estimation of small \$p\$ -values](#), ATLAS statistics forum, 29 July
- [17] [Nested sampling for frequentist computation: fast estimation of small \$p\$ -values](#), Purple Mountain Observatory, 9 July
- [18] [Evidence for axion-like particles from XENON1T and astrophysical data](#), NCBJ, Warsaw, 12 January
- 2020 [19] [Nested sampling cross-checks using order statistics](#), Monash University, 21 July
- [20] [Nested sampling cross-checks using order statistics](#), Cambridge University, 15 July
- 2019 [21] [Strong first-order phase transitions in the NMSSM and methods for finding them](#), SJTU-U. Sydney Workshop on the Electroweak Phase Transition, Tsung-Dao Lee Institute, 19 December
- [22] [Bayesian and frequentist approaches to discoveries](#), PASCOS, July 2
- [23] [Bayesian and frequentist approaches to resonance searches](#), Purple Mountain Observatory, 16 April
- 2018 [24] [Statistical Analyses of Higgs- and Z-Portal Dark Matter Models](#), Nanjing Normal University, 25 June
- [25] [Statistical Analyses of Higgs- and Z-Portal Dark Matter Models](#), Melbourne University, 8 March
- 2017 [26] [Relative plausibility of scientific theories: WIMP dark matter](#), Fundamental Physics, Symmetry and Life, University of Sydney, 30 November
- [27] [Halo-independence with quantified maximum entropy](#), NCTS Workshop on Dark Matter, Particles and Cosmos, Taiwan, 14 October
- [28] [Halo-independence with quantified maximum entropy](#), NTU, Taiwan, 12 October
- [29] [Halo-independence with quantified maximum entropy](#), IPMU, Tokyo, 4 October

Other talks

- 2026 [30] [Mapping the ALPs: A Naturalness Map for Axions and ALPs](#), The Fifth International Conference on Axion Physics and Experiment (Axion 2026), 10 August
- [31] [Mapping the ALPs: A Naturalness Map for Axions and ALPs](#), XJTU, 10 June

- 2024 [32] [The status of fine-tuning arguments in the CEPC era](#), CEPC New Physics Workshop, 31 August
- 2023 [33] [Origins of parameters in adimensional models](#), Colloquium, XJTU, School of Maths and Physics, 28 September
- [34] [Origins of parameters in adimensional models](#), MaxEnt 2023, 7 July
- 2021 [35] [Nested sampling for frequentist computation: fast estimation of small \$p\$ -values](#), Computational Tools for High Energy Physics and Cosmology, 26 November
- [36] [Getting the most out of particle physics experiments](#), Workshop on Hadron Structure at High-Energy, High-Luminosity Facilities 2021, 27 October
- [37] [Pitfalls in likelihood land](#), (Re)interpreting the results of new physics searches at the LHC, 18 February
- 2020 [38] [Nested sampling cross-checks using order statistics](#), First International Symposium on the Interdisciplinary Frontiers of Gravity, Matter and Quantum Information, 28 December
- 2019 [39] [Strong first-order phase transitions in the NMSSM and methods for finding them](#), SJTU-U. Sydney Workshop on the Electroweak Phase Transition, 19 December
- [40] [Combined collider constraints on neutralinos and charginos](#), The tenth Weihai New Physics Workshop, Shandong University, 14 August
- [41] [Bayesian and frequentist approaches to resonance searches](#), Fourteenth workshop on TeV physics, Nanjing, 21 April
- [42] [Bayesian and frequentist approaches to resonance searches](#), Nanjing Normal University, 17 April
- 2018 [43] [Non-parametric uncertainties in the dark matter velocity distribution](#), Auckland University, 10 December
- [44] [Statistical Analyses of Higgs- and Z-Portal Dark Matter Models](#), Seoul, ICHEP 2018, 6 July
- [45] [Potential applications of machine learning in particle physics](#), Machine Learning Symposium, National Centre for Synchrotron Science, 19 March
- 2017 [46] [Using Bayes factors to understand anomalies at the LHC](#), Energy Frontier in Particle Physics: LHC and Future Colliders, NTU, Taiwan, 30 September
- 2016 [47] [The Jeffreys-Lindley's Paradox](#), CompStats Meeting, Monash University, 1 November
- [48] [Bayesian approach to naturalness](#), Fine-tuning, the Multiverse and Life, Sydney, 24 November
- [49] [Naturalness of the relaxion mechanism](#), CosPA, Sydney, 29 November
- [50] [Bayesian naturalness of Next-to-Minimal and Minimal Supersymmetric Models](#), SUSY 2016, Melbourne, 5 July
- [51] [Naturalness of the relaxion mechanism](#), SUSY 2016, Melbourne, 7 July
- [52] [Naturalness of the relaxion mechanism](#), CoEPP Annual Theory Meeting, Melbourne, 16 February
- 2014 [53] [Prospects for constrained supersymmetry at \$\sqrt{s} = 33\$ TeV and \$\sqrt{s} = 100\$ TeV proton-proton super-colliders](#), Deep Inelastic Scattering, Warsaw, 29 April
- 2013 [54] [Bayesian reconstruction of SUSY parameters via the golden decay](#), Theory Meets Experiment, Warsaw, 6 October
- [55] [Status of CMSSM after LHC Run-I](#), HEP IOP, Liverpool, 9 April
- 2012 [56] [The CMSSM after 2 years of the LHC](#), Consortium for Fundamental Physics, Sheffield, 9 April

- 2011 [57] [Bayesian Implications of Current LHC Limits for the Constrained MSSM](#), Young Theorists' Forum, Durham, 13 December
- [58] [Supersymmetry and the LHC](#), Seminar, University of Sheffield, 1 October

Teaching & Supervision

PROFESSIONAL DEVELOPMENT

- 2025 ▪ [Instructional Skills Workshop](#), XJTLU, **Certificate of Completion**, 24 hours

CURRICULUM DEVELOPMENT

- AY23 – 24 ▪ Representative, Department of Physics, *School Curriculum Review Panel (SCR)*

SUPERVISION AND MENTORSHIP

Postgraduate

- 2025 –
AY26 – 27 ▪ Primary supervisor for physics Ph.D. student, Hao Yang
- AY25 – 26 ▪ Supervising MSc Data Science student, Sunxiao Shen
- 2022 – 2024 ▪ Supervised MSc Data Science student, Qiao Wen, on noisy optimization methods
- 2020 – 2021 ▪ Supervised [Qiao Li](#) for three-year Master's project on measuring contributions to precision observables using Gaussian processes [[2306.17385](#)]
- 2020 – 2021 ▪ Informal supervisor [Liangliang Su](#) Master's project, writing two papers [[2006.03371](#), [2010.13884](#)]. Now postdoctoral researcher at KIT, Karlsruhe and author of Migdal effect discovery [[Nature 649 \(2026\) 8097, 580–583](#)]
- 2016 – 2018 ▪ Supervised (10%) Ph.D. student, [Giancarlo Pozzo](#), on baryogenesis in next-to-minimal supersymmetric models. My role included QFT tutorials

Undergraduate

- 2023 – 2026 ▪ Supervised 4 SURF summer projects involving over 15 students, including building a Lorenz wheel and a Galton board
- 2023 – 2026 ▪ Supervised 8 Final Year Projects — [MTH301](#). Former student [Qihong Jiang](#) now Ph.D. in stochastic modelling at Queen Mary University of London
- 2022 – 2023 ▪ Supervised 10 undergraduates leading to [[2211.03258](#)]. [Huifang Lyu](#) now Ph.D. at GRAPPA, University of Amsterdam
- 2017 – 2018 ▪ Supervised undergraduate project about the bounce equation and its connection to phase transitions and baryogenesis
- 2015 – 2016 ▪ Supervised undergraduate [Michael Bardsley](#)'s summer project. We developed statistical software resulting in a publication [[1603.00555](#)]. Michael subsequently completed a Ph.D. in particle physics at Monash University (2024)

TEACHING

- AY25 – 26
 - Led [PHY002-2526-S5](#) Mechanics — 2.5 credits — 2,701 students. Responsible for overseeing 9 co-teachers, laboratory sessions and assessments
 - Taught [MTH101-2526-S1](#) Engineering Mathematics I — 5 credits — 70 students
- AY24 – 25
 - Taught [PHY001-2425-S2](#) Classical Physics for Engineers — 2.5 credits — 115 students
 - Taught [MTH101-2425-S1](#) Engineering Mathematics I — 5 credits — 196 students
- AY23 – 24
 - Taught [PHY002-2324-S2](#) Physics — 5 credits — 217 students
 - Taught [MTH101-2324-S1](#) Engineering Mathematics I — 5 credits — 140 students
- AY22 – 23
 - Taught [PHY002-2223-S2](#) Physics — 5 credits — 123 students
- 2019 – 2022
 - Post-graduate course on physics beyond the Standard Model — about 20 students and about 25 hours
- 2015
 - Lectures on statistics for physicists at the University of Tartu — six hours and about 5 students
- 2012 – 2013
 - First-year physics tutor, weekly tutorials — about 20 sessions with about 10 students
- 2010 – 2012
 - Undergraduate physics weekly problem class assistant — about 30 students

Service

MEDIA

Articles in international news outlets, blogs and our University Marketing and Communications (UMC). Coauthored [article](#) about [Phys. Rev. Lett.](#) that was syndicated in 212 non-Chinese media outlets in 7 languages with a total of about 700 000 unique readers per month. The media exposure for this alone corresponds to an advertising value equivalency of about **\$1.4 million USD**. For more details see the [UMC30 day media report](#).

Selected internal news articles

- [Dr. Andrew Fowlie joins NANOGrav](#)
- [Dr. Andrew Fowlie publishes a high-level review](#)
- [Nanohertz gravitational waves are cool but not supercool](#)
- [SMP wins 8 NSFC grants in 2024](#)
- [28 projects approved](#)

Selected external news articles

- [Phys.org](#) and [Monash University press](#) about [Prog. Part. Nucl. Phys.](#)
- [Phys.org](#) about [Phys. Rev. Lett.](#) paper
- [Big Think](#) about [Nature Commun.](#) paper
- [ABC News \(Norway\)](#) about [Eur. Phys. J. C](#) paper

DEPARTMENTAL

- 2024 –
 - *Departmental Events Officer*. Organizing regular seminars – see [Seminars @ Department of Physics](#). Growing connections to other academic units. More than 30 seminars in last three years
- 2023 –
 - *Departmental IT Officer*. Initiated and led department webpage update to raise departmental profile — see [Department of Physics](#)

- 2019 – 2023
 - Built and maintained group [webpage](#)
 - Organized [online seminar series](#), including [event with Nobel Laureate](#) with audience of over 3,500

COLLABORATIONS

- 2023 – CIRCULAR ELECTRON-POSITRON COLLIDER (CEPC) — A proposed next-generation world-leading experiment in fundamental science
- 2016 – [GAMBIT](#) — International collaboration performing statistical analyses of models of new physics
- 2024 – 2025 [NANOGRV](#) — World-leading pulsar-timing array search for gravitational waves to contribute towards data analysis
- 2011 – 2013 BAYESFITS — Bayesian analyses of supersymmetric models in light of first run of LHC, led by [Prof. Roszkowski](#)

EDITORIAL

Referee for **physics journals**: *Nature Commun.*, *Phys. Rev. Lett.*, *Phys. Rev. D*, *Eur. Phys. J. C*, *J. Phys. G*, *Ann. Phys.*, *Metrologia*, *Nucl. Phys. B*, [SciPost Physics](#), *Int. J. Mod. Phys. A*, and *Astronomy & Astrophysics*

Referee for **statistics journals**: *Stat. Pap.*, and *Stat. & Comput.*

Referee for **software journals**: *J. Open Source Softw.* and *Comput. Phys. Comm.*

- 2020 – 2023 Editor for [Journal of Nanjing Normal University, Physical Sciences](#)

UNIVERSITY

- 2025
 - Internal peer reviewer for 2025 NSFC RFIS candidates, June 9
- 2024
 - Presented at Experience Sharing for Research Fund for International Scientists, 11th December
- 2023
 - Jiangsu CEAA Interviewer at XJTLU — 2 days
- 2023 – 2025
 - Coordinated University staff social football & tennis clubs

Education and other relevant experience

- 2009 – 2013 Ph.D., University of Sheffield, UK
[Bayesian Approach to Investigating Supersymmetric Models](#). Supervised by [Prof. Roszkowski](#). Viva passed with minor corrections, examined by [Prof. King \(University of Southampton\)](#) and [Prof. van de Bruck \(University of Sheffield\)](#)
- 2009 – 2010 [Scuola Internazionale Superiore di Studi Avanzati \(SISSA\)](#), Trieste, Italy
 Six-month placement studying advanced topics in particle physics and related subjects
- 2005 – 2009 M. PHYS, University of Durham, UK
 First-class four-year undergraduate Master's in Physics. Final-year modules included Advanced Theoretical Physics (82%) and Particle Theory (90%). Master's project, *The Search for Dark Matter at the Linear Collider*, supervised by [Prof. Moortgat-Pick](#) (73%)
- 2006 & 2007 Summer placement at electricity supplier E.ON about numerical simulation of atmosphere with parallel computing
